Education

University College Dublin

BSc Computer Science with Data Science and AI

Relevant Coursework: Algorithms, Data Structures, OOP

Expected Graduation: May 2027

Dublin, Ireland

Projected Grade: 1:1 Honours

Technical Skills

Languages: Python, Java, TypeScript, SQL, Bash, HTML, CSS, SwiftUI, React

Tools and technologies: Git, Firebase, PostgreSQL, Next.JS, Tailwind, MySQL, Figma, JUnit, Docker, GraphQL

Practices: Unit testing, Object Oriented Programming, Agile, Project-Management, Scrum

Projects

IBM Bob Widget | Desktop App

Typescript | Electron | Node.js | Lottie

- Developed a cross-platform desktop application using Electron and Node.js to provide real-time status monitoring for IBM's internal **large language model (LLM)**, parsing output files to display task progress.
- Engineered a real-time UI to **support human-in-the-loop agentic workflows**, enabling users to monitor long-running AI agents and issue approvals without manual log inspection.

Jiramon | Jira/Monday.com integration service

Typescript | Node.js | Docker

- Built bidirectional middleware syncing Jira and Monday.com in real time via an **Express REST API** and webhooks, with a layered architecture and **GraphQL** query layer.
- Engineered a background service monitoring CI/CD failures that auto-creates Jira tickets.
- Containerised with **Docker** for deployment on IBM Cloud.

Fantasy Premier League Notification System | App

SwiftUI | Firebase | Python

- Developed an IOS app integrating **Python** scripts and **Firebase**, to push real-time FPL updates.
- Implemented **API** based backend logic to detect changes in game database and push relevant notifications.

Hex Oust | Game

Java | JavaFX | JUnit

- Led a **3-person agile** team to build a turn-based board game, designing **MVC** architecture in **JavaFX**.
- Implemented full suite of **JUnit tests** covering all aspects of the project.

Experience

Technical Product Manager Intern

March 2026 - Present

IBM Dublin, Ireland

- Owned end-to-end delivery of a product feature for the customer-facing portal, coordinating design handoff, writing tickets, running sync calls, and tracking progress to release.
- Built product dashboards surfacing sales and pipeline metrics, using static (**HTML/JavaScript**) and **React** frontends backed by **PostgreSQL** and containerised with **Docker**.
- Independently developed internal PM tooling to support team workflows.

Full-Stack Web Developer

June 2025 – Present

Self-Employed

- Design and develop responsive client websites in **Next.js**, with reactive **TypeScript** features improving **UX**.

Technical Assistant

July 2025 – September 2025

Gromtec Europe

Bray, Co. Wicklow

- Enhanced WordPress site functionality by resolving security issues, **optimising for SEO**, and configuring **Google Analytics** for traffic monitoring.
- Automated price updates for 32 products on WooCommerce site using an Excel import system, reducing update time from **over an hour to under 6 minutes**.

Summer Intern

May 2024 – September 2024

Ronan Group Real Estate

Dublin

- Developed a PowerShell script to rename files by reformatting dates in filenames, reducing a **5-minute** manual task to **~10 seconds per folder**.
- Facilitated the transfer of company database to cloud servers, reducing company expenses by **€2500+** per year.
- Collaborated with another intern to research the implications of AI in the business, presented findings to senior management, and helped drive **companywide adoption of LLMs** for basic task support.
